

The Exinda Appliance 8064 is our fastest growing physical model and is designed for true data center scale. This solution provides monitoring and control that scales to support a bandwidth of up to 6 Gbps. Popular with mid and large size enterprises and educational institutions with a rapidly growing demand from users, devices, apps, and activities across all network locations, this appliance is built to facilitate growing demand. The Exinda 8064 makes it easy to protect application SLAs during high volume peak hours as well as control recreational traffic and streaming video.
