How to set up GFI Exinda AI

GFI Exinda AI helps you manage your network more easily by using artificial intelligence. With just a few steps, you can enable features that save time, improve performance, and make configuration much simpler, even if you're not a technical expert.

What you need before you start:

- ✓ An existing GFI Exinda NetworkOrchestrator installation (version 7.6 or newer).

- ✓ Valid license that includes AI features.

- ✓ Internet connectivity in the management port.

- ✓ DNS configured in GFI Exinda.

Setup steps

1 Update your GFI Exinda device

Make sure you're using the latest software:

- Go to **Configuration** > **System** > **Maintenance** > **Firmware Update** in your GFI Exinda web interface.

- Choose the option that best fits your needs (Install from URL, from downloaded file, from local file, etc.)

- Accept the terms and click Install Image.

- Restart your device when asked.

2 Check your license

- Go to **Configuration** > **System** > **Setup** > **License.**

- Make sure your license covers the AI features.

- If not, contact GFI or your usual reseller to get the right license.

3   Turn on GFI Exinda AI features

Make sure you're using the latest software:

- In the menu, go to **Configuration > System > Setup.**

- Find the **AI features** section.

- Turn on these options:

    ◦ **AI Wizard.**

    ◦ **AI Advisor.**

4   Check your license

- Go to **Configuration > Traffic Policies > Optimizer.**

- Click the AI Wizard button or icon.

- Type what you want in simple language (for example, "give zoom calls the highest priority").

- The system will show you what it will do, review and accept the changes.

5   Set up the AI Adviser (Smart suggestions)

- Go to **Monitor > Reports.**

- Find **AI Adviser** or **AI Reporting.**

---

⑦ Need help?

→ AI features are extra add-ons. If you're not sure if you have them, check with your reseller or GFI.

→ For questions or technical support, visit GFI's website or check the GFI Exinda product documentation.
