

GFI MailEssentials Editions

GFI Software™

What is GFI MailEssentials?

GFI MailEssentials is an email security solution that protects you against malware and spam. It comes with 14 anti-spam filters, 3 antivirus engines, content filtering and many more security features.

Available GFI MailEssentials Editions

The [trial version](#) of GFI MailEssentials contains all features for customers to test the product capabilities. However, when [purchasing](#), the application is licensed in the following three editions:

1. AntiSpam Edition

This edition includes more than a dozen anti-spam filter engines and an automatic whitelisting service that updates the whitelist records by monitoring your outgoing emails. It also includes the anti-phishing engine that uses a constantly updated database to make correct judgments when blocking threats. This edition does not include the antivirus engines that block malware threats.

2. EmailSecurity Edition

- This edition includes up to 3 antivirus engines and additional supplementary protection services to block incoming emails with malware threats like viruses, Trojans, malicious attachments, and scripts.
- This edition does not include any anti-spam filters.
- GFI MailEssentials currently ships with the powerful Avira and BitDefender Antivirus engines, offering advanced email protection against viruses and other malware with minimal impact on system performance. Additionally, customers can opt to add in the Sophos antivirus engines for the ultimate protection. This enables customers to take advantage of the strengths of each engine as Antivirus engine vendors have different response times to new viruses and malware.

3. UnifiedProtection Edition

This edition includes all features from the AntiSpam and Email security editions

	EMAIL SECURITY EDITION	ANTI SPAM EDITION	UNIFIED PROTECTION EDITION
EMAIL MANAGEMENT	✓	✓	✓
CONTENT FILTERING	✓	✓	✓
EMAIL SECURITY	✓	✗	✓
ANTI SPAM	✗	✓	✓

Note: All editions consist of a full reporting dashboard, advanced content filtering options, and support for virtual environments. Currently, VMware and Hyper-V are the only supported platforms for virtualization. Additionally, support for the following six languages is also included: English, German, Spanish, Italian, Russian, and Polish.
